DESCRIPTION

This class 2 and class P, UL & cUL listed enclosed electronic power supply is the perfect solution for wiring multiple low voltage fixtures. Class 2 power supplies are intrinsically safer power supplies because they are compartmentalized to allow no greater than 5 amps of current to be drawn on each compartment. Enclosure cover is easy to remove. Power supply has knockouts on three sides with clips for line voltage wiring. Secondary wiring for class 2 power supplies do not require conduit sheathed cable or clamp wiring techniques. This power supply has a low minimum load requirement of either 3W, 6W, or 9.6W to allow the use of LED products. May be dimmed using a TRIAC or electronic low voltage dimmer.

FEATURES

- Short circuit, over current, over voltage, over temperature protection.
- Dimming with TRIAC/ELV dimmers
- UL Class 2 Output
- High Power factor > 0.9, and THD • FCC Part 15 Class B Compliant
- 5 year warranty
